The cover artwork was painted by Lily Du in a children's class at the Corban Estate Arts Centre. Situated on Great North Road, Henderson, the arts centre is popular with both adults and children and holds an exciting and wide range of evening, day and weekend courses.

Volume One – Overview and Summary
Volume Two – Council activities
Volume Three – Financial Information
Volume Four – Council Policies

Volumes One and Three contain information about the Community Outcomes and the Council's strategic direction.

The Community Outcomes belong to the community and are not the Council's outcomes. The Council has to show how it will contribute to furthering these. Progress to achieving the Community Outcomes is also very dependent on input from external organisations and key agencies. There are memoranda of understandings with these organisations and agencies.

The strategic platforms are the mechanism that the Council uses to deliver its vision which incorporates its identified priorities.

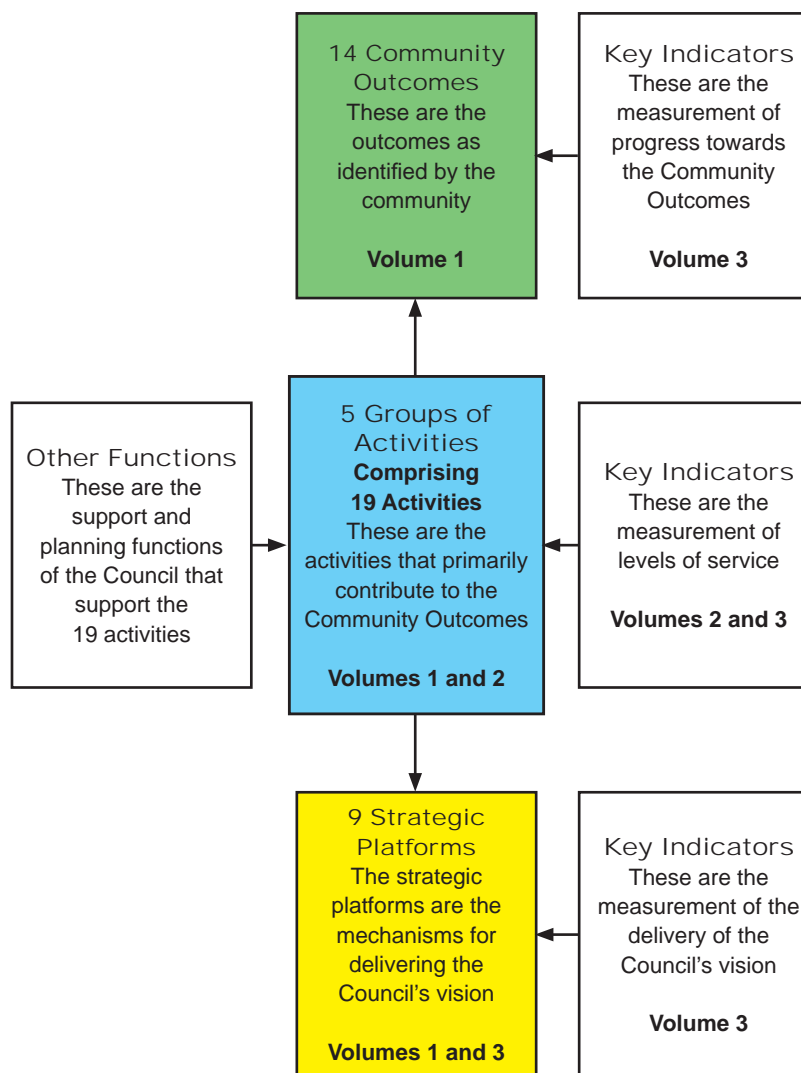

The following charts demonstrate the relationship between the Community Outcomes, the key activities and the Council's strategic platforms to deliver the Council's vision and how these will be measured.

All activities make some contribution to the Community Outcomes and the strategic platforms so the charts are designed to show the primary contributions.

The first chart shows:

- How the activities link to the Community Outcomes to show how the Council will contribute to achieving these outcomes.
- How the activities link to the Council's strategic platforms to deliver the Council's vision.

The second chart shows the relationship of each activity plan to Community Outcomes and strategic platforms.

As a requirement of the Local Government Act 2002 this document has been audited by Audit New Zealand and their opinion is on page 8 in Volume 1.
